## CRAFT NFT

Grow fresh and healthy food

Hydroponics NFT is best system to grow leafy vegetables as well as small fruiting plants such as determinate types of tomatoes. The rectangular cross section provides enough space for the roots without blocking the water and nutrient flow.

All our NFT systems has ROI of 1.5 – 2 yrs derived from Spinach production.

## CRAFT NFT

Safe food for everybody!

Our NFT systems are very popular with our clients. Every client who has bought our NFTs, has come back for even bigger systems.

Our technical support and relentless work with our customers has produced many satisfied customers.

Even though it is easy to install on your own, we provide installation services at nominal prices across India.

### A. NFT – A160

Designed to support 160 plants. Vertical A frame (3.5 X 10 FT) allows us to grow these many plants in only 35 SqFt.

Rs 35,000.00

### B. NFT – A200

Designed to support 200 plants. Vertical A frame (3.5 X 10 FT) allows us to grow these many plants in only 35 SqFt.

Rs 40,000.00

### C. NFT—H100

This Horizontal NFT system has 5 horizontal pipes resting on table height stands (5 X 10 Ft) for eas of working. Each pipe has 20 pots giving us space for 100 plants.

Rs 22000.00

### D. NFT- H120

This Horizontal NFT system has 6 horizontal pipes resting on table height stands (5 X 10 Ft) for eas of working. Each pipe has 20 pots giving us space for 120 plants.

Rs. 25,000.00

## CRAFT Trough and Media bag system

Grow own economical and safe food!

Trough system and Grow bags are most economical Hydroponics systems.

Grow bags and trough systems could be designed for Simple hydroponics, where the nutrient water is more diluted and fed to troughs or grow bags filled with a grow media. The nutrient water is only fed in minute amount so that there is no drainage at all. This systems are most used in commercial Hydroponics farms.

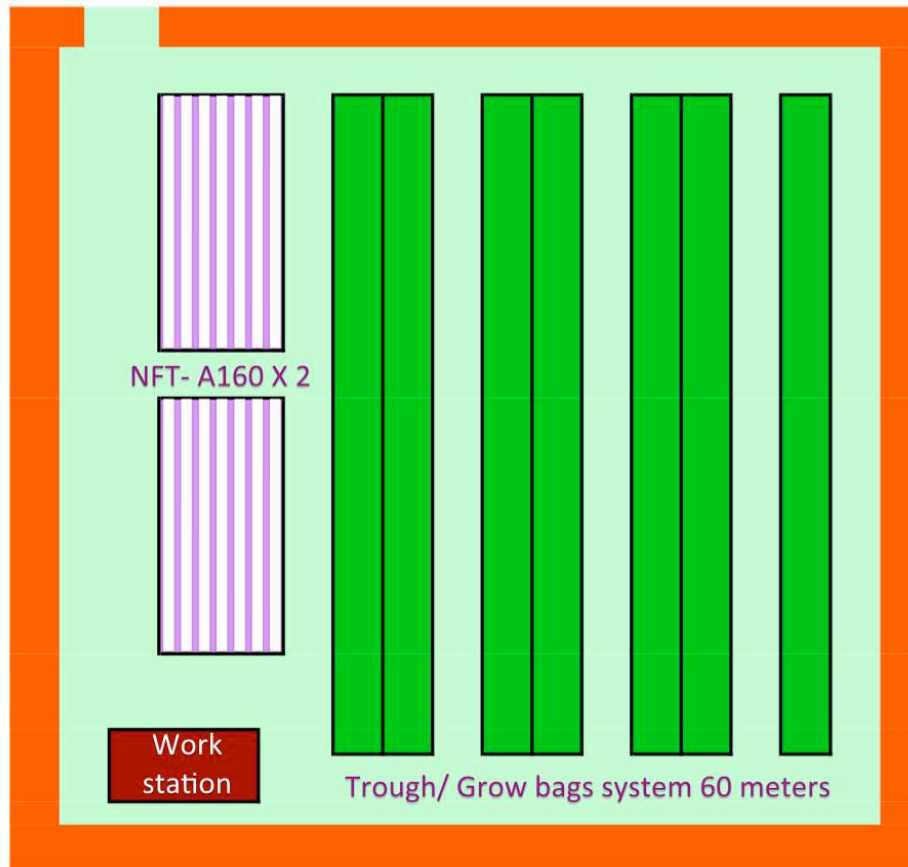

For terrace and backyards farming, we offer combinations of NFT and trough system.

The price is for 1 running meter of trough (45 cm Wide) system including media, piping etc.

(item: TR-1M) Rs. 900.00

A typical  
1000 Sq Ft  
combo pack  
CO-1000

## CRAFT Combo Systems

Best of both worlds

CRAFT Combo systems provide the best of both NFT and Trough systems for area more than 500 Sq Ft.

The typical drawing illustrated above is for 1000 Sq Ft. It has provision for 320 leafy vegetable plants and 250 fruit bearing vegetable plants.

The NFT system supports spinach, lettuce, amaranths, pak choi, methi, corriender, mint plants.

The trough system supports bigger plants such as tomato, cucumber, chili, capsicum, guards, egg plant.

Trough system also support bigger plants such as moringa (drumstick) and papaya. Potato, ginger, beatrod, carrots also can be grown in this system.
